

## Nursing staff: Please fill out once a shift and place on patient's clipboard. This will follow patient to MBU and will be used until discharge

| Date | AM Shift | PM Shift | Temperature | New onset of<br>symptoms<br>(Y/N)* | Staff Initials |
|------|----------|----------|-------------|------------------------------------|----------------|
|      |          |          |             |                                    |                |
|      |          |          |             |                                    |                |
|      |          |          |             |                                    |                |
|      |          |          |             |                                    |                |
|      |          |          |             |                                    |                |
|      |          |          |             |                                    |                |
|      |          |          |             |                                    |                |
|      |          |          |             |                                    |                |
|      |          |          |             |                                    |                |
|      |          |          |             |                                    |                |
|      |          |          |             |                                    |                |

## \*New Onset of Symptoms: fever, cough, sore throat, shortness of breath or Temperature of 37.8C or 100.0 F

If a *visitor* is experiencing any of the symptoms, they must be sent down to the 1500-Respiratory Care Center on the 1<sup>st</sup> floor for testing or sent home; <u>they will</u> not be able to stay with the patient.
