

CLEANING & DISINFECTION OF iPADS

For Patients with Suspect or Confirmed COVID-19

Read All Steps Prior to Removal:

- iPads shall remain in their designated Otterbox cases for their entire time in use
- iPads remaining in patient rooms during admission should be included in HTC process by nursing during their shift
- iPads remaining in patient rooms during admission can be Bioquelled in room after patient discharge
- Coordinate with another HCW for hand-off process of clean iPad

iPad Removal from Room: BEFORE all contact PPE has been doffed in room

1. Use an Oxivir wipe to clean and disinfect the iPad. Observe the 60 second wet time. Discard wipe when done.
2. Using new Oxivir wipe, open door.
3. Hand iPad to HCW who is outside of room and ready to receive iPad. HCW receiving iPad can wipe iPad using Oxivir wipe for 60 second wet time.
4. Close door. Commence doffing PPE process per PPE checklist.

Rotation of iPads through Bioquell:

- iPads that are cleaned and disinfected using the Oxivir process as above may also be Bioquelled on a regular basis. The schedule of Bioquelling will be dependent on the iPads in rotation, to be determined by the needs of the unit.
